For InfoBeans Technologies Ltd

Surbhi Jain
Company Secretary and Compliance Officer

InfoBeans Achieves Prestigious CMMI Level 5 Appraisal for Development

InfoBeans, a leading provider of design-led AI and enterprise software solutions, proudly announced its achievement of Capability Maturity Model Integration (CMMI) Level 5, Version 3.0 for Development—the highest maturity level in this globally recognized framework for process improvement and performance excellence.

CMMI Level 5 signifies the pinnacle of process maturity, where organizations operate at an “optimizing” level. This means that processes are continuously refined using data-driven insights to achieve excellence. At this level, organizations prioritize sustainable growth, enhanced efficiency, and robust risk management. For InfoBeans, this milestone reflects a culture of innovation, proactive improvement, and unwavering commitment to delivering exceptional value.

“This highlights the team’s overall process maturity and competency, as well as InfoBeans’ dedication to continuous improvement. It strengthens our team’s confidence in tackling complex and challenging projects that demand a high level of process maturity and innovation.” Rajagopalan Kannan, Sr. VP of Transformation & Technology Excellence, stated.

Achieving CMMI Level 5 represents a significant transformation from previous maturity levels, where the focus shifts from merely managing processes to actively optimizing them.

This accomplishment underscores InfoBeans’ dedication to:

Fostering a culture of continuous improvement by leveraging data and advanced analytics to predict trends and outcomes.

Streamlining processes that align with global standards, ensuring reliability, consistency, and efficiency.

Driving innovation to meet evolving business needs while maintaining operational stability.

The appraisal, conducted in partnership with PCA Global Services, is a testament to InfoBeans’ ability to implement best practices and optimize processes across its operations. By achieving CMMI Level 5, InfoBeans has joined an elite group of organizations worldwide that prioritize operational excellence and data-driven decision-making. For more details, visit [CMMI Appraisal Record](#).

As InfoBeans celebrates this milestone, the company remains committed to setting even higher benchmarks, ensuring that every interaction, project, and deliverable embodies its signature ‘Creating WOW’ philosophy. This achievement marks the start of an exciting new chapter, with excellence and innovation continuing to drive every aspect of its operations.

About InfoBeans

InfoBeans specializes in design-led AI and software solutions for its enterprise clients to solve their most complex business problems. We are listed on the NSE & BSE in India with a presence in the US, Europe, and the Middle East. We intently focus on the philosophy that InfoBeans is our team's second home. We work hard every day to grow a work culture that fosters collaboration and excellence. InfoBeans Foundation, our CSR arm, helps underprivileged sections of society become employable through our free one-year training programs.

Creating WOW! is not just a tagline for us; it's our religion!
